

## **Statistical Employment Report**

Each year, Colorado Public Television (CPT12) submits an annual “Station Activities Survey” to CPB. One section of this survey is a *Statistical Employment Report*, which includes statistical employment information about the CPT12 workforce that CPB requests to develop an EEO profile of the public television system.

The information in this report is generated from CPT12 personnel records. The original copy of this report is kept in the CPB Integrated Station Information System (ISIS) file for CPT12, which can only be electronically accessed by the General Manager or Business Manager. A copy of this report is available in CPT12’s CPB Public File for the public to review.
